

Commercial and Industrial HVAC Energy Efficiency

The Ameren Missouri BizSavers[®] program offers cash incentives for virtually any cost-effective energy efficiency measure including specialized heating, cooling and ventilation systems. Whether you're running a small business or large corporation, your company may qualify to receive cash back for improvements to your facility's cooling and HVAC.

Benefits of Energy-Efficient HVAC Units:

30-50% Less Energy

Upgrading HVAC equipment can reduce your building's HVAC energy usage by 30-50% and can result in substantial operating cost savings.

Improved Comfort

Efficient HVAC systems can improve indoor comfort while using less energy, using advanced controls and variable speed motors to provide the right temperature, right away.

Longer life

The addition of or upgrade to new motors and/or variable speed drives can extend the life of your HVAC equipment while improving efficiency.

Quick Upgrade Payoff

Ameren Missouri's new HVAC incentives can cover 75-100% of the upgrade cost from the standard efficiency option, making payback quick and increasing long-term savings.

HVAC Energy Efficiency In Action!

To give you an idea of what you could save, BizSavers Program past participants that installed HVAC energy efficient upgrades saved an average of 163,000 kWh annually and earned an average of \$22,000 in incentives per project!

Small Commercial Space

Updates Installed: **New 15 Ton Packaged Rooftop Unit**

Total Incentives Paid: **\$3,550**

Annual Energy Savings: **10,661 kWh**

Annual Energy Cost Reduction: **\$983**

Corporate Office Building

Updates Installed: **HVAC Controls, Cooling, EMS**

Total Incentives Paid: **\$149,726**

Annual Energy Savings: **969,717 kWh**

Annual Energy Cost Reduction: **\$71,177**

HVAC Incentives

Efficient Equipment	Size (Tons)	Incentive
High Efficiency Packaged/Split System DX	Less than 11.5 tons	\$20 per ton per SEER/IEER of improvement over baseline
High Efficiency Packaged/Split System DX	Greater than 11.5 tons	\$25 per ton per IEER of improvement over baseline
High Efficiency Air Source Heat Pump	Less than 5.5 tons	\$20 per ton per SEER of improvement over baseline
High Efficiency Air Source Heat Pump	Greater than 5.5 tons	\$25 per ton per IEER of improvement over baseline

Please refer to the Standard Program Guidelines and Terms & Conditions for full program rules.

Get Started on a Project

Inefficient HVAC units use a LOT of energy and that unnecessary energy results in wasted dollars that could be redirected to better uses within your business. Our business development representatives can assist in analyzing your business's opportunities to save. Ameren Missouri also works with a great network of contractors to help with the application process and installation of your energy efficiency project to make it even easier!

To get started, visit AmerenMissouri.com/BizSavers to learn more about available incentives, [find a Trade Ally](#) or post your project to the [BizSavers Bid Board](#), which is an easy way to connect with a contractor.
