

# Savings for Industrial Buildings

## Stack Up Savings With Energy Efficiency Upgrades

Industrial buildings, which include manufacturing, mining, agriculture and construction, account for almost a third of total U.S. energy use. In many industrial settings, motors, drives and machines account for a great deal of energy use, while warehouses see the majority of their electricity use come from lighting, cooling and HVAC equipment. Upgrading to more energy-efficient technologies will save you money now and over the long term, with many upgrades paying for themselves within a year or two. The Ameren Missouri BizSavers® Program has incentives available to help you get your business running more efficiently.

### How Industrial Customers Use Energy

### Top Ways to Save

Efficient Chillers & Motors

Compressed Air

HVAC Controls

### Get Started Saving!

Now that you know what to upgrade, visit [TradeAllyNetwork.com](http://TradeAllyNetwork.com) to find an approved contractor or contact a Business Development Representative at [BizSavers@Ameren.com](mailto:BizSavers@Ameren.com) or 1.866.941.7299.

### Savings in Action

**\$14,678,740**

Total incentives distributed

**175,525,539**

Total kilowatt-hours saved

**1351**

Program participants

### Success Story:

#### Nike Ihm

\$148,697 in incentives earned  
1,319,590 annual kWh reduction  
\$79,835 annual electricity savings

Upgrades included:  
Cooling, HVAC
